Master of Software Engineering

[2022.10]

Program:
Master of Software Engineering

Overview

Software engineering is an evolving discipline which aims to build and maintain effective and practical high-quality software using engineering methods. Since information technology leads to the rapid development in Internet, cloud computing, big data, and artificial intelligence, there is an increasing demand for talents in this field. Furthermore, School of Software Engineering USTC has been ranked top ten domestically in recent national review and has gained increasingly immense popularity from applicants in China.

Duration: 2 years
Instruction Language: English
Annual Tuition: RMB 30,000
Start Date: September 2023

Application Period ： Oct. 20, 2022 to Feb. 15, 2023

Online Application website: https://isa.ustc.edu.cn

Application Requirements: Bachelor's degree in science and engineering; Curriculum Vitae; Three recommendation letters; English proficiency certificate; Personal statement

School/Department: School of Software Engineering of USTC

Scholarships:

Although it's a self-funded program, applicants have a chance to get full or partial tuition waiver. In general, one third of the registered international students could get scholarships to cover their full or partial tuition, and/or stipend, based on their semester or annual academic performance.

Internship Partner Enterprises

We set up internship bases or various cooperation with a list of over 60 IT or IT related companies. The list includes Intel, IBM, Bosch, Zoom, Huawei, Tencent, Baidu, Alibaba and USTC iFlytek. Nearly one year internship in the company boosts students' confidence in their ability and

knowledge for the real industry and equips them with project experiences and employability skills which meet the needs of the enterprises.
